EDUCATION

Bachelor of Technology in Computer Science with Artificial Intelligence and Machine Learning

IIMT University, Meerut, U.P., India | 2023 - 2027

- GPA: 3.0, Relevant Courses: Machine Learning, Data Science, Deep Learning, Natural Language Processing, Time Series Forecasting, Data Structures, DBMS & SQL, Software Engineering

WORK EXPERIENCE

IT Intern

Aug 2026 - Sep 2026 (2 months)

APL APOLLO TUBES Ltd (On-Site | Noida)

- Applied Python, Machine Learning, AI, and forecasting to support data-driven analysis and business decision-making.
- Built and automated workflows for production monitoring, inventory management, vendor payment reminders, and auction processes using n8n.
- Developed and managed web-based solutions to support internal business operations and streamline process workflows.

PROJECTS

SegmentIQ

Customer Segmentation Engine

Tech Stack: Python, Pandas, NumPy, Scikit-learn, K-Means Clustering, Matplotlib, Seaborn, Jupyter Notebook

- Developed a machine learning-based customer segmentation using clustering techniques to identify distinct customer groups based on behavioral and spending patterns.
- Performed data preprocessing, exploratory analysis, feature engineering, and clustering to extract meaningful customer patterns.
- Transformed segmentation results into actionable business insights and interactive dashboards to support data-driven customer targeting.

Voice Verse

AI-Powered Multilingual Video Communication Platform

Tech Stack: Python, Django, JavaScript, WebRTC, WebSocket, Whisper, NLP, Machine Translation, Text-to-Speech

- Developed an AI-powered video calling application enabling real-time speech transcription and multilingual translation between participants speaking different languages.
- Built a speech-to-text → translation → text-to-speech pipeline to convert spoken conversations into the listener's preferred language during video calls.
- Applied AI, speech processing, natural language processing, and real-time communication technologies to reduce language barriers in cross-language conversations.

SKILLS

Programming Languages: Python, Django, SQL

AI/ML & Data Science: Machine Learning, Regression Models, Feature Engineering, Model Evaluation, Data Preprocessing

Natural Language Processing (NLP): TF-IDF, Text Vectorization, Cosine Similarity, Keyword Extraction

Generative AI & LLMs: Prompt Engineering, Context Engineering, API Integration (OpenAI)

Frameworks & Tools: Scikit-learn, Pandas, NumPy, Streamlit, GitHub, Jupyter Notebook

CERTIFICATE

AI/ML for Geodata Analytics -ISRO,IIRS

AI- Machine Learning Engineer Certificate Course -Reliance Foundation

Data Analysis using Python -Samatrix.io

Data Science Training - Internshala Trainings
